Merma Marine

About Us

Welcome to Merma Marine, where 17 years of expertise in boat building fuel our commitment to innovation, craftsmanship, and sustainability. With a dedication to creating eco-conscious partnerships, we're redefining yacht building to align with a greener future.

Our in-house production engineering allows us to oversee each phase of construction, ensuring unmatched quality and efficient, eco-friendly processes. In July 2023, we began a new chapter, focusing solely on serial composite yachts, led by our flagship project, Merma -ID113, which embodies our pursuit of excellence.

Beyond yacht building, we lead in composite manufacturing, using advanced materials like e-glass and carbon fiber. Guided by a visionary approach, Merma Marine is setting new standards in sustainable and innovative yacht construction.

Shipyard

Our 1000-square-meter shipyard is equipped with advanced facilities dedicated to composite production, utilizing vacuum infusion technology. This cutting-edge method ensures enhanced durability, reduced weight, and increased structural integrity for all our vessels, including the MermaID113-. With meticulous attention to quality and detail, our shipyard brings together innovative techniques and craftsmanship to create boats that stand out in both performance and design.

Unmatched Performance

Powered by twin engines, the Mermaid - 113 offers exhilarating speeds of up to 48knots, ensuring a thrilling yet smooth ride on the water. With a range of power options, this vessel balances powerful performance with efficient cruising capabilities, making it perfect for long voyages or short coastal explorations.

Spacious and Thoughtful Design

Designed for comfort, the Mermaid - 113boasts an open layout with ample space for up to 11 people. Featuring an adjustable salon area, convertible sleeping spaces, a fully equipped kitchen, and a separate shower area, it seamlessly blends functionality with luxurious comfort, providing an ideal setting for relaxation and social gatherings.

Built for Endurance

Constructed using advanced GRP epoxy vacuum infusion technology, the Mermaid -113 s hull is both lightweight and resilient. This robust build, combined with high-quality materials and detailed craftsmanship, ensures lasting durability, giving you peace of mind and confidence in every journey.

Elegance and
Power on Water

Wide Beach Deck Experience

The MermalD113-s innovative folding bulwarks transform the rear deck into a spacious «beach deck,» allowing you to enjoy an open, seamless connection with the water. When unfolded, these bulwarks expand the usable deck area, creating an ideal space for relaxation, socializing, and easy access to the sea. Whether you're anchored in a quiet bay or cruising along the coast, the beach deck offers a new level of freedom and comfort on the water.

With the beach deck design, getting in and out of the water is more accessible and safer than ever. The widened space provides a stable platform for activities like swimming, diving, and lounging close to the water's edge. This thoughtful feature combines functionality with a luxurious sense of openness, making each moment on board feel like a true escape to your own private oasis.

Nautical
Dream

Seaside Comfort Onboard

Mermaid - 113 offers unmatched comfort and style, crafted for those who crave both elegance and adventure on the water.

Pure Freedom.

The Mermaid - 113s deck showcases meticulous craftsmanship and attention to detail, offering a blend of durability and elegance. Each element is designed to enhance your onboard experience, ensuring that style and function meet seamlessly, creating the perfect foundation for your adventures on the water.

Signature Style.

The Mermaid - 113s spacious saloon flows effortlessly into the open deck area, creating a unified and expansive environment. Designed to maximize comfort and accessibility, this layout allows for easy movement and a seamless connection between indoor luxury and outdoor freedom, perfect for relaxation and entertaining alike.

The Mermaid-113 s layout is thoughtfully designed to enhance functionality and comfort, featuring adaptable tables in the salon and aft deck that expand the boat's sleeping capacity. In the salon, the table can be lowered and extended to create a spacious two-person bed, allowing this social area to transform into a cozy sleeping space when night falls.

On the aft deck, the table also serves dual purposes. When lowered, it converts into a sunbed, perfect for relaxing and soaking up the sun during the day. Additionally, the lower deck includes a separate toilet and shower, ensuring added privacy and convenience. The forward deck also features a sunbed, providing an additional private space for lounging. This layout maximizes both relaxation and utility, making the Mermaid 113 a versatile choice for extended stays on the water.

LOWER DECK

MAIN DECK

Lower Deck Cabin

The standard model of the MermalD - 113 offers a spacious and elegantly designed cabin, providing a comfortable sleeping area with modern, minimalist aesthetics. Large windows allow natural light to flood the space, enhancing the feeling of openness and connection with the surrounding sea.

The bathroom is equally refined, with a separated toilet and shower area for added privacy and convenience. High-quality fixtures and a thoughtfully arranged layout ensure that the bathroom feels both functional and luxurious. Together, these spaces deliver an inviting and relaxing onboard experience, blending style and practicality seamlessly.

Main Deck

Salon

The standard Mermaid - 113 salon is designed to offer both versatility and comfort. With a dining table that easily converts into a double bed, this space adapts effortlessly to provide additional sleeping accommodation. Large windows and an open layout bring in ample natural light, creating a bright and airy ambiance that connects you with the surrounding sea.

The salon also includes a fully-equipped galley module, allowing for convenient meal preparation without missing out on the beautiful views. With direct access to the aft deck, the layout ensures seamless indoor and outdoor living, making this space ideal for both relaxation and entertaining on the water.

Customized Interior

The Mermaid 113 interior is designed to adapt to your personal taste and lifestyle needs. Every element is crafted with meticulous attention to detail, allowing for unique customization options that bring your vision to life. From choosing premium upholstery fabrics to selecting materials and finishes, the Mermaid 113 provides a wide range of choices to enhance the interior space, creating an atmosphere of elegance and comfort that reflects your style. Each cabin feature is ergonomically designed, offering the perfect balance between luxury and functionality.

With a fully customizable layout, you can maximize the space to suit your boating adventures. Whether it's a cozy lounging area or an upgraded kitchen module, the Mermaid 113 is versatile enough to accommodate family outings or social gatherings. Attention to lighting, adjustable seating, and smart storage solutions elevate the comfort on board, ensuring you and your guests feel at home, no matter how far the journey takes you.
